- Capstone Consultancy Project
- International study trip
- Exchange semester abroad
- Strategy module (developed at Harvard Business School)

SPECIALISATIONS

From the beginning, you can select one of two specialisations:

- Marketing Analytics
- Treasury & Investment

ACADEMIC DEGREE

Master of Arts in Business, MA

ECTS CREDITS

120

DURATION

4 semesters (full-time)

LANGUAGE

English

STUDY START

Last week in August

LOCATION

Wiener Neustadt Campus

HIGHLIGHTS

- International student body and faculty
- Strategy module (developed at Harvard Business School)
- International study trip
- Research focus
- Social & professional development
- Capstone Consultancy Project
- Optional exchange semester abroad

DETAILS

Further detailed information, all dates and deadlines of the study programme can be found at [fhwn.ac.at/mbci](https://www.fhwn.ac.at/mbci).

Turning business generalists into expert leaders

The Business Consultancy International Master's Degree Programme (MBCi) is an internationally focused programme taught entirely in English. It provides a particularly stimulating environment in which you and your fellow students from many different nations and cultural backgrounds work together with an international faculty.

Building upon a first degree in business, the two-year programme prepares you for future leadership positions with global companies. In the MBCi programme you can choose to specialise in one of the two specialisations:

- Marketing Analytics
- Treasury & Investment

Throughout the programme, you will acquire a range of management and consultancy skills in addition to specialisation in the areas of financial management and investment analysis, or in marketing and data analytics. It is envisaged that these courses will build on previous knowledge.

Through close collaboration with agencies, banks and other important companies, the curriculum combines traditional theory and methodology with hands-on tools and skills through case studies, projects and seminars. The contributions from you and your peers, combined with team work and social networking events, create additional added value on top of what is already a cutting-edge degree programme.

FH-Prof. Dr. Robert Pichler, MBA, Head of Programme

“We prepare you for a career
in international business – as an expert and leader.”

MULTICULTURAL MICROCOSM

There is no amount of theory that can fully prepare you for the challenges and rewards of actually working in and managing diverse teams. As worldwide markets and corporations become increasingly integrated and connected, you as a student are expected now, more than ever, to have a global approach and experience working in a multicultural environment.

The MBCi degree programme is your key to gaining that knowledge, by offering an immersion into a real melting pot of cultures and attitudes. Our students not only come from a variety of national and ethnic backgrounds, but along with that comes a diversity of academic and working experiences. Many of our lecturers, who provide their expertise to you, are employed in international companies, and in addition, a number of professors come from foreign universities to teach courses as part of the programme.

GOING INTERNATIONAL

A key aspect of the MBCi degree programme is the international study trip in the final semester. In the past our students travelled to a variety of international business hubs such as Shanghai, New York, London and Hong Kong for an intense week of company visits, presentations and business tours.

During the trip you gain an invaluable perspective of doing business in these centres, learn about the local challenges and opportunities and participate in interactive seminars with industry leaders from different business fields. The programme is designed to complement your theoretical studies, ensuring valuable synergies between theory and practice. Additionally, it provides networking opportunities as you engage with high-level business executives in their business environment.

EXCHANGE SEMESTER

The exchange semester at a partner university is an opportunity available to all successful students in the fourth semester of their studies. The university currently has over 80 partner universities scattered around the globe; many of them offer an exchange opportunity at Master's level. The exchange semester is optional.

SOCIAL & PROFESSIONAL SKILLS

The importance of professional skills should not be underestimated. Most functions in business and in particular consultancy, involve interpersonal communication, team projects, presentations and other cooperative activities.

The MBCi programme provides you with instruction in a number of key social and professional areas including leadership, consultancy and intercultural skills. These ensure that, upon graduation, you are able to perform business activities with a large degree of professional competence.

Foto Tschank

Accelerate your career on the fast track

In the MBCi programme, the majority of courses are led by highly qualified practitioners in their respective fields. The specialisation courses are designed by the university faculty in collaboration with expert lecturers to offer you an education that combines traditional theory with the skills and tools that are required on day one in the workplace. Small class sizes facilitate an intense and interactive learning environment whereby you will work with both the lecturers and your fellow students.

CAPSTONE PROJECT

The Capstone Project is a compulsory course in the fourth semester of the programme, where the entire Master's class is divided into different consultancy teams. For one semester you take on the role of junior consultants to work on exciting real-life business projects for a real company.

The Capstone client companies come from a broad range of industries and may include innovative start-ups as well as established, global companies. Your findings and recommendations are presented in detail to the client company management, which provides a great opportunity for you to build and nurture important business relationships.

FROM THE FIELD

"The MBCi students were able to dissect a difficult business problem for us in Spain, and came up with real tangible options to address the current situation. Students quickly focused on the core issues and developed an integrative approach for us to deliver a business solution. Their work reflected real core business skills, from detailed analysis to high-level presentation skills. Our senior staff were very impressed by the outcome, and we would welcome the opportunity to work with students from the MBCi programme again."

Andreas Prüller, MSc

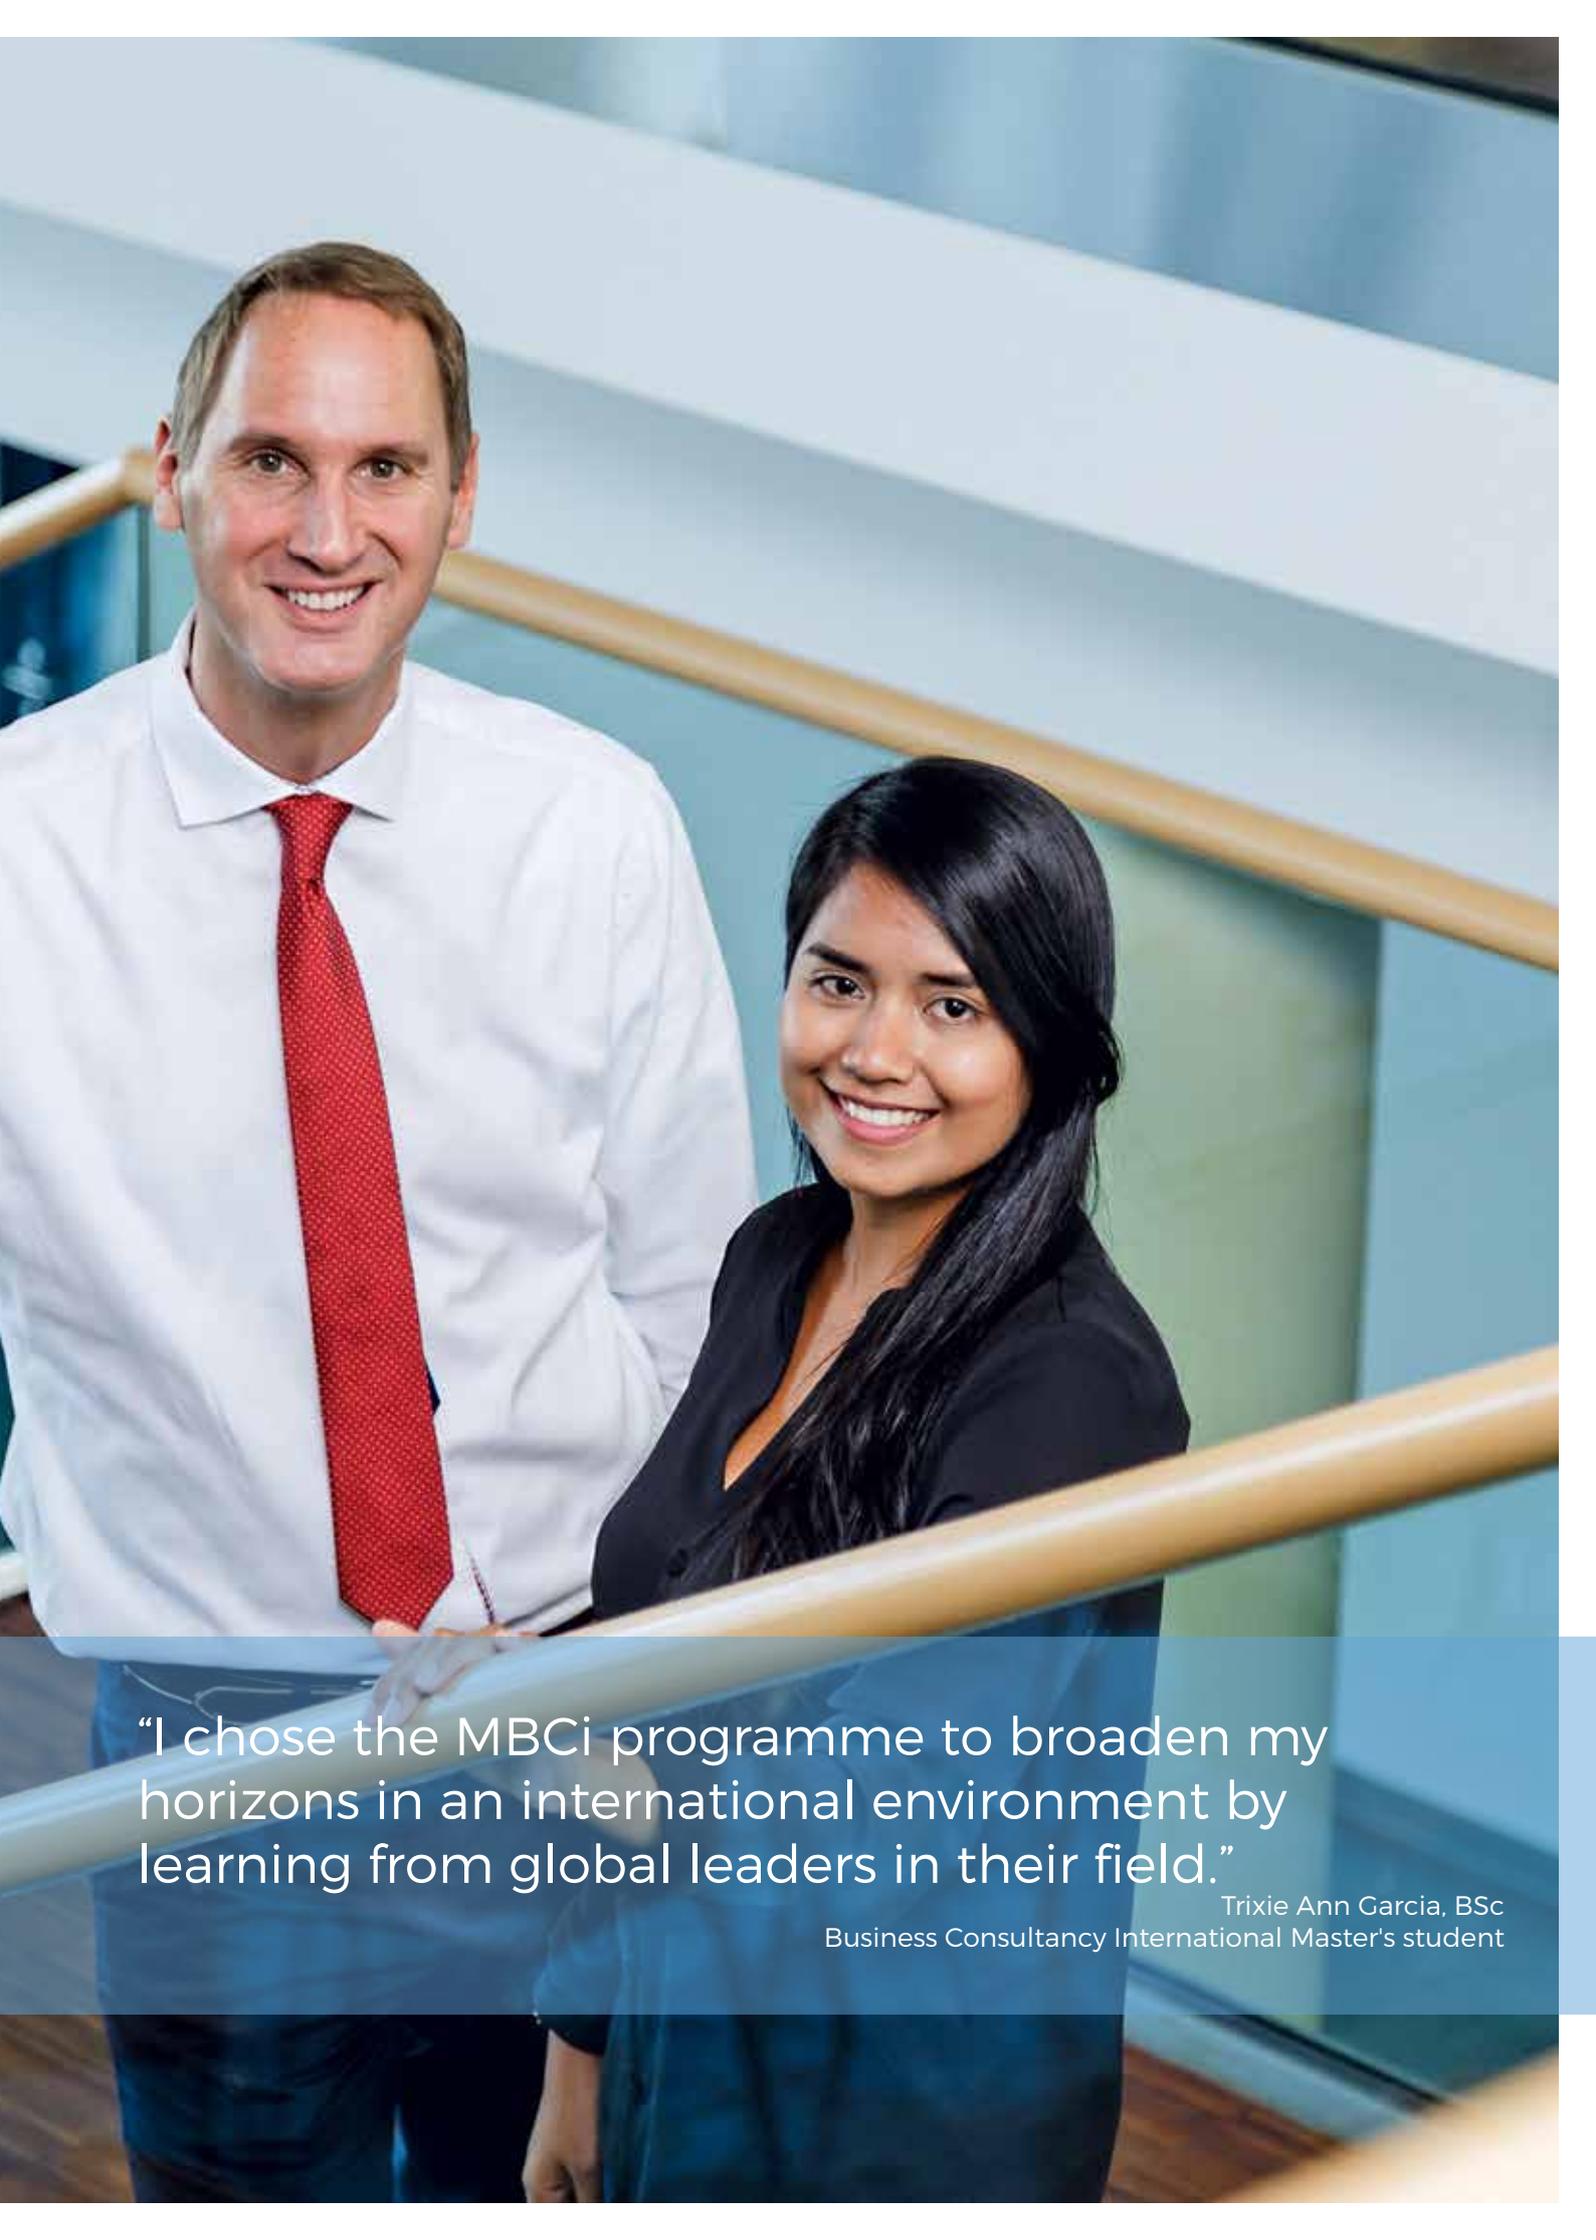

Customer Solution Management, Kapsch CarrierCom AG

INTERNATIONAL CAREER OPPORTUNITIES

- Marketing consultant
- Marketing analyst
- Market researcher
- Product and brand manager
- Account executive
- Customer insight manager
- Media manager
- Treasury / risk manager
- Investment banker
- Chief financial officer (CFO)
- Investment analyst
- Financial consultant
- Portfolio / fund manager
- Trader

“I chose the MBCi programme to broaden my horizons in an international environment by learning from global leaders in their field.”

Strategy module (developed at Harvard Business School)

Our university is one of only four universities in Austria that is certified to teach the strategy module Microeconomics of Competitiveness, which was developed by Professor Michael Porter at Harvard Business School.

This module looks at the competitiveness of a business / an industry / a region by applying different strategy models. This course is particularly suited for future leaders who wish to work in an international setting. We have integrated this module in our curriculum so that you as an MBCi student benefit from a cutting-edge course, developed by one of the most distinguished scholars in the field of strategy and competitiveness.

Stringent quality standards – accreditation by FIBAA

Both the Business Consultancy International Bachelor's and Master's degree programmes voluntarily underwent the rigorous accreditation process of FIBAA (Foundation for International Business Administration Accreditation).

FIBAA is a European, internationally oriented agency for quality assurance and quality development in higher education. Its international quality seal certifies not only the outstanding quality of the MBCi programme, but also facilitates the international recognition of both the programme and the degree.

Marketing Analytics

In today's increasingly connected society and rapidly changing business world, the proliferation of data is paramount. As data and technology are transforming the marketing field at lightning speed, there is a need for data-savvy marketing leaders who combine an in-depth understanding of strategic marketing with strong analytical skills and a passion for discovering insights.

The Marketing Analytics specialisation prepares students to be forward-thinking marketing specialists who are comfortable with numbers and able to make marketing decisions based on sound data analysis. It teaches students how to design and deliver robust statistical analysis, convert data into insights, transform information into communication, and ultimately make strategic marketing decisions. Students gain a firm grounding in the essentials of strategic marketing, while developing the analytical skills needed to thrive in today's rapidly evolving, information-driven business environment.

TESTIMONIAL

"The BCI Master's degree programme gave me a solid foundation in business studies – and especially in marketing – within an international context. Lecturers and students from all over the world, as well as hands-on experience through working with companies, enabled me to build an international network and gain practical insights into various businesses.

As a marketer, my career requires me to constantly analyse data, conceive action plans to implement and present my recommendations in a strategic context. For this purpose, the BCI programme provided me with a broad set of tools and prepared me for the challenges of the marketplace today."

Alexander Zimm, MA,
Senior Market & Proposition Manager SME, UPC Business Austria GmbH

FOCUS AREAS

Discovering insights to drive marketing actions.

MARKETING	ANALYTICS	CONSULTANCY
Strategic marketing management	Quantitative and qualitative data analysis	Social and interpersonal skills
Supply chain performance	Media metrics and digital media	Strategic management and business policy
Customer insights	Forecasting and trend analysis	Company consulting project
Marketing research	Pricing analytics	Consultancy skills
Campaign management	Database management	Consultancy models

Treasury & Investment

At the heart of every well-functioning organisation is a team responsible for keeping track of its funds and managing investments. This role requires an in-depth understanding of various aspects of financial markets and instruments, corporate finance, risk management, cash management and general business strategy. Treasury & Investment combines these fields of finance to manage the overall well-being of an organisation.

Since the global financial crisis, an increasingly volatile economic environment combined with large overhauls of regulations and procedures has led to the treasury function becoming increasingly important. The Treasury & Investment specialisation addresses the need for highly skilled professionals in these fields by delivering a comprehensive set of skills and applied knowledge required for a successful career in international treasury management, investment analysis and financial consultancy.

TESTIMONIAL

"Internationality and business relevance were the two most important criteria for the choice of my Master's studies - I found both and much more in the BCI programme. I was provided with a firm foundation of business skills in my finance specialisation, and through interaction with a mix of different nationalities, I could practice my intercultural competence on a daily basis. Thus, when joining a large international company, I had the relevant skillset for this kind of working environment. The right combination of technical, analytical and practical know-how helped me to quickly adjust to this environment and supported me in progressing my career."

Lenka Laurencikova, MA
M&A Expert, Zumtobel Group

FOCUS AREAS

Unique combination of finance, investment and consultancy.

TREASURY	INVESTMENT	CONSULTANCY
Cash and liquidity management	Analysing financial statements	Social and interpersonal skills
Evaluating investment opportunities	Issuing investment recommendations	Strategic management and business policy
Financial planning and forecasting	Managing portfolios and asset allocation	Company consulting project
Evaluating funding alternatives	Valuing securities	Consultancy skills
Risk management	Underwriting services	Consultancy models

HIGHLIGHTS

- Courses by finance and investment professionals from top-notch international companies
- Practical, ready-to-use skillset based on sound theoretical knowledge
- Financial programming and modelling with the use of Excel and the R language
- Extracurricular business competitions and financial research challenges
- Networking events with alumni and finance industry professionals
