

U.S.A, 2016

Senior Business Development Engineer:

Currently I am leading the expansion of the U.S office for ENPULSION. Working in R&D for a few years as well as in the engineering field for over 10 years, has provided me with the tools needed to excel. These tools would not have been possible without the Fachhochschule Wiener Neustadt. I started the MSc program at FHWN in 2013 which opened the door to a few experiences. The QB50 project, named, "Pegasus", which I was heavily involved in played a key role in my career path but what also had an impact was the R&D company, FOTEC. With the education I had at FHWN and the work experience I gained from FOTEC, during my studies, really prepared me for which direction I wanted to take in my career. There were many lessons I learned while I attended FHWN, both positive and negative, however, this was truly a life-changing experience and one of the best decisions I made in my life. If only they had a Ph.D program, then I would probably continue my education there..
